Address blocks can have street name and number. The numbers are sandblasted and painted, and can be easily read from the curb of most streets. Most Custom font styles are available. Where one to three numbers are needed, a larger font can be used. Fonts used are script or block. Sizes available: 9 x 16 inches
12 x 16 inches
12 x 20 inches

Cast stone custom signs

An address block is a plaque that has been inscribed with a property's street number, the street number and name, or even logo or symbol. With multiple size and design options available, cast stone address blocks are a good solution for making your property address visible from the street. Cast stone address blocks can be used in full masonry applications such as a brick and rock mailbox surround, or can be used in a thin veneer application such as stucco or thin cut rock veneer.

Cast Stone address blocks (markers) are installed in the brick or stone veneer of a home or building. They can be placed near the front door, over a garage, window, or other entrance, or in a brick mailbox on the street.
